SHIP MODEL RESTORATION QUESTIONNAIRE © 1984

Our policy is to retain as much of the original work as possible and to maintain fidelity to the original builder's techniques. If logistics or geographical location does not permit a first hand evaluation, we can through the use of this "Questionnaire" and several good quality color photographs, derive an approximate, 'pro forma', estimate for the restoration of a given ship model.

A visual inspection of the model will be necessary before a Formal Estimate is rendered. The actual costs may vary either way from the original estimate. If work is contracted, a 1/3 deposit is required before work can begin.

PLEASE SUPPLY A MINIMUM OF 3 NON-RETURNABLE COLOR PHOTOS (full view and close-up detail).

Vessel's name: _____ Vessel type: _____
Model builder: _____ Scratch built Modified Scratch built Kit Decorative
Approx. age of model/when built: _____ Approx. scale: _____
